

Food Record Form

You can complete the highlighted fields on this form online and then print the form for easy reference. Only text that is visible on the form is printed; scrolled text will not print. Any text you enter into these fields will be cleared when you close the form; you cannot save it.

A food record can help you evaluate your eating habits and track your progress in making changes.

Sample food record

As you record your intake, fill in the check boxes to account for the amount you eat from each food group. To do this, you will have to know how much you need from each food group. For example, let's say your breakfast consisted of:

- 2 cups cornflakes—This equals 2 ounces from the grain group.
- 1 cup (8 fl oz) milk—This equals 1 cup from the milk group.
- 1 large banana—This equals 1 cup from the fruit group.
- 1 cup (8 fl oz) orange juice—This equals 1 cup from the fruit group.

Based on this breakfast, you would fill in two check boxes for the grain group, one check box for the milk group, and two check boxes for the fruit group. Your record would look like this:

Number of cups or ounces (each square is equal to 1 cup or ounce)

Grains (bread, cereal, pasta, rice)	<input type="checkbox"/>
Meats and meat alternatives (nuts, eggs, fish)	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Vegetables	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Fruits	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Milk and milk products	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Other	<input type="checkbox"/>

How to use your food record form to track and improve your eating habits

At the end of your recording period, tally the total number of cups or ounces from each food group and divide by the number of days. For a personalized food guide with the recommended daily amount for each food group, see the interactive Web site: www.mypyramid.gov.

After seeing which foods you need to eat more or less of, pick one or two changes that you want to work on. Don't try to change your eating habits all at once. If you consistently eat too few fruits and vegetables, for example, you might try making a goal of eating one or more fruits and/or one or more vegetables per day. Then, instead of recording everything you eat, you could record only your fruits and vegetables.

Another way to track your food intake is to record what you eat for several days when you first start making changes in your eating habits. Then do it again in a few weeks or months. Compare your first record with your second. How have you improved?

Food Record Form

Use the form below to keep a food record over several days. Categorize the foods you eat into food groups, and each day mark a square to account for the amount you eat from each food group.

Number of cups or ounces (each square is equal to 1 cup or ounce)

Grains (bread, cereal, pasta, rice)	<input type="checkbox"/>
Meats and meat alternatives (nuts, eggs, fish)	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Vegetables	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Fruits	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Milk and milk products	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Other	<input type="checkbox"/>
